SOFTWARE DEVELOPER

Skilled BTech student in C++, Flutter, Firebase, and UX/UI design.Passionate about building dynamic, scalable applications.Confident in making valuable contributions and excelling as an asset in any organization.

TECHNICAL SKILLS

Languages	:	C++, Dart, Python
Frameworks	:	Flutter
Development Tools	:	VS Code, Git, GitHub, Android Studio, Figma

EXPERIENCE

Flutter Developer - Intern   June 2023 – Present
Suraasa   *Remote*

- Successful Flutter Application: Developed an app using the Flutter framework, gaining over 5000+ downloads on the Play Store.
- 5-Star Rating: The Suraasa for Teachers app has received a perfect 5-star rating from satisfied users.
- Enabling Global Teaching: Empowered Indian teachers to pursue opportunities in the UAE by completing PgCTL courses through the app.

Flutter Developer - Intern   Jan 2023 – July 2023
CRUV   *Remote*

- Developed user-friendly screens for **UNISEN**, a platform that simplifies applying to foreign universities using **Flutter**.
- Gained valuable Flutter development experience by raising over 20 PRs and learned from experienced developers during the internship.
- Contributed to a socially impactful project and learned about creating user-centered products.

EDUCATION

Bennett University - (50% scholarship)   9 cgpa
Bachelor of Technology in Computer Science (Scholar)   *Greater Noida, Uttar Pradesh*
2021 – Present

Meerut Public School   93%
Non-medical Science - 10+2   *Meerut, Uttar Pradesh*
2021

Meerut Public School   95.2%
10th   *Meerut, Uttar Pradesh*
year - 2019

PROJECTS

Suraasa for Teachers - Internship at Suraasa   *Flutter, Git, GitHub, Firebase, API*

- *   Flutter-Powered Success: 5000+ downloads, 5-star app for teachers pursuing PgCTL in the UAE.
- *   Thriving Flutter Community: Collaborative space for teachers, united by Flutter technology.
- *   Scalable & Dynamic: Future-ready Flutter architecture to meet evolving education demands.

Amigo   *Flutter, Git, GitHub, Firebase*

* Developing an intuitive food ordering app with **Flutter** and **Firebase** for college students.
* Leveraging Flutter's UI and Firebase's backend for a sleek interface, tracking, and payment options.
* Collaborating with a team to create a reliable app with positive beta feedback and an upcoming launch.

Unisen - Internship at CRUV   *Flutter, Git, GitHub*

* Designed and developed user-friendly screens for UNISEN using Flutter, improving the application process for students.
* Collaborated with a cross-functional team to integrate UI designs and APIs for UNISEN, gaining valuable experience in project management and teamwork.

AWARDS AND ACHIEVEMENTS

Hackeye - ICOSMIC   *Flutter, Git, GitHub, Firebase*

* 9th finalist in Hackeye, showcasing strong programming and collaborative skills among 145 participants
* Developing an intuitive food ordering app with **Flutter** and **Firebase** for college students.
* Leveraging Flutter's UI and Firebase's backend for a sleek interface, tracking, and payment options.

Driver Drowsiness Detection System   *Python,openCV,pygame,tkinter*

* Top 20 finalist in Comp-a-thon hackathon, showcasing strong programming and collaborative skills.
* Developed driver drowsiness system using OpenCV, Pygame, and Tkinter that detects driver fatigue and alerts in real-time.

LEADERSHIP

Technical Chairperson - Alan Turing Club

* **Strategic Leadership:** Directed technical initiatives, fostering innovation and collaboration among team members.
* **Dynamic Event Organization:** Orchestrated cutting-edge workshops, seminars, and events on AI, ML, and data science.
* **Technical Skill Development:** Spearheaded coding challenges, hackathons, and competitions to enhance members' technical proficiency.
